Designed by **Greensward** Design Team

**Skill Level** - Beginner

**Time to Complete** - 2 hours  
(Does not include drying time)

### Supplies:

#### \* **Makin's Clay - The No Bake Clay**

- No Kneading, conditioning, or baking required!

- 60g Neon Yellow clay
- 60g Neon Orange clay
- 60g Neon Pink clay
- 60g White clay
- 60g Red clay
- 60g Blue clay

#### *Recommended Tools:*

- \* **Makin's Brand** Roller
- \* Craft knife

#### *Other Materials:*

- \* Prepared layout of black outline snake design (Use the Reference Outline given or make your own freehand)
- \* Clear PVC acetate
- \* Wooden Frame - 2 1/2 in (W) x 3 1/2 in (H)
- \* White Glue

**1.** Take about 3/4 of a 60 gm pack of Neon Yellow clay (wrap up the remaining clay and place in an airtight container for future use). Roll out a 25cm long tube of Neon Yellow clay (15mm thickness) using the **Makin's Brand** Roller. Keep the thickness at 15mm. Either lay the long "snake" on top of a prepared drawing covered by clear PVC, or cover the frame with a sheet of clear PVC and lay on top of the frame in a "snake" fashion as you see in the picture, making a oval shaped "coil" with a head sticking out at the edge. Press down very slightly so that the back of the snake is flattened to fit to the frame. Leave to partly dry while you make the decorations.

### Step 1

**2.** Roll out 2 small balls (approx. 8 mm diameter) of White clay for the eye balls. Add black dots for the eyes with the black pen. Cut a very small piece of Red clay for the tongue and cut out a triangle at one end to create a forked 'tongue'. Attach these to the snake's head.

### Step 2

Next, take 1/5 of each 60 pack of Neon Orange, Blue and Neon Pink clay (Use more colors if you prefer.). Roll out each color clay individually to form 3 sheets (1mm thin) using the **Makin's Brand** Roller.

**3.** Place the Neon Orange, Blue & Neon Pink clay sheets on top of each other in layers and trim them into a rectangle shape (5cm wide, 6cm in length) using the craft knife

### Step 3

**4.** Tightly roll up the rectangular layers into a spiral log (approx. 13mm diameter).

### Step 4

**5.** Wait at least 20-30 minutes for the log to dry and cut slices into 1mm thicknesses. Place the spiral slices randomly onto the snake's body, securing them with white glue. Wait around 20-30 minutes for the log to dry and then slice into flower shapes of 1~2 mm thickness.

### Step 5

**F**inal. Now that the snake body is half-dry; glue the snake onto the wooden frame, after removing PVC sheet

the wooden frame, after removing PVC sheet.  
Leave overnight in the open air until completely dry.

Then insert your favorite picture and enjoy!
